The "Student Development Program for Multifaceted International Collaboration Hubs (MICH)" is a new international graduate program offered by the Graduate School of Informatics and Engineering, the University of Electro-Communications (UEC). The program starts in the Fall Semester of academic year 2020. The program has been selected to be part of the prestigious Japanese government (MEXT) special scholarship program.

The program aims to graduate engineers and scientists who can bridge the gap between fields of specialization, industry and academia, and national borders, forming a network of trained individuals who can collectively contribute to SDGs, higher education in developing countries, etc. To this end MICH recruits excellent international students interested in Informatics and Engineering. They will be joined by Japanese students, who study under the same curriculum, and together they are expected to become global leaders with broad perspectives.

2. Course Overview

- Students will pursue a desired major by enrolling in one of the following Departments or Joint Doctoral Program: Department of Informatics, Department of Communication Engineering and Informatics, Department of Mechanical Engineering and Intelligent Systems, Department of Engineering Science, and Joint Doctoral Program for Sustainable Research.
